

Dawn Bonnell is a Trustee Professor of Materials Science at the University of Pennsylvania and the Director of the Nano/Bio Interface Center. She received her PhD from the University of Michigan and was a Fulbright scholar to the Max-Planck-Institute in Stuttgart, Germany, after which she worked at IBM Thomas Watson Research Center. Her current research involves atomistic processes at oxide surfaces, nanometer scale electronic phenomena in materials, and assembly of complex nanostructures. She has authored or coauthored over 180 papers, edited several books, including *Scanning Probe Microscopy and Spectroscopy: theory, techniques, and applications*. Her work has been recognized by the Presidential Young Investigators Award, the Ross Coffin Purdy Award, the Staudinger/Durrer Medal, and several distinguished lectureships. Professor Bonnell serves on several editorial boards, national and international advisory committees, is a past president of AVS, served the governing board of the American Institute of Physics, and is a past vice president of the American Ceramic Society. She is a fellow of the Am. Cer. Soc, the American Association for the Advancement of Science, and the AVS.
